PROFESSIONAL SUMMARY

Results-driven AI engineer and full-stack innovator with 5+ years of hands-on experience building intelligent automation systems, scalable web/mobile applications, and AI-driven products. Proven track record of shipping projects to production: live iOS/Android apps on the App Store and Play Store, deployed websites, and end-to-end AI workflows. **Runner-up in a national Agentic AI competition.** Passionate about solving real-world problems through rapid prototyping and systems thinking.

EXPERIENCE

- 2025 – Present* **AI Engineer / Full-Stack Developer**, Ideofuzion (Pvt.) Ltd., Islamabad, Pakistan
Lead and contribute to production projects across AI automation, web, mobile, and blockchain. Selected deliverables:
- **TulipATS**: Built and shipped a fully functional hiring-funnel automation platform integrating multiple recruitment tools to streamline end-to-end candidate tracking.
 - **Tajseer (iOS & Android)**: Loan management and disbursement app. Coded core features, built the admin panel with pixel-accurate Figma implementation, and handled deployment.
 - **Pink3 (AI-Powered CRM, forked on Twenty CRM)**: Customer & resource management platform. Integrated Discord, Telegram, and WhatsApp bots where AI agents autonomously navigate the website UI and execute tasks on behalf of users.
 - **RealCrowd (iOS)**: Social-discovery app for finding the most populated venues across the UAE — live on the App Store.
 - **TabibFinder (iOS)**: Doctor appointment booking app — live on the App Store.
 - **Tarteeb (iOS & Android)**: Cross-platform laundry pickup, tracking, and management app.
 - **RentyRoyz**: Built operational systems for a real-estate company that leases unfurnished apartments, furnishes them, and lists them on Airbnb.
 - **Zero-Trace VPN**: Programmed, debugged, and deployed a privacy-focused VPN service from scratch — live and operational.
 - **Sparkline (Mobile App)**: Owned end-to-end Android/iOS development. Resolved event creation, database integration, real-time messaging sockets, and UI; delivered the final production build.
 - **Wasatah POC**: Prototype focused on workflow orchestration, backend APIs, and proof-of-concept validation.
 - **Zencore (Chrome Extension)**: Converted a web wallet into a Chrome extension, resolving wallet-integration and browser-security limitations.
 - **Cryptoket**: Deployed and optimized a blockchain-based website on production servers.

ACHIEVEMENTS

- **Runner-Up — Agentic AI Competition.** Recognized for building an autonomous AI agent system.
- Shipped multiple iOS and Android apps to the App Store and Play Store.
- Deployed multiple production websites and live services serving real users.

EDUCATION

2023 – Present **BS Artificial Intelligence**, COMSATS University Islamabad, Pakistan
Currently in 6th semester (3 years completed, ~1 year remaining).

TECHNICAL SKILLS

<i>Languages</i>	Python, JavaScript, TypeScript, PHP, Java, Swift, C++, SQL, HTML/CSS, Bash
<i>Frameworks</i>	Flask, FastAPI, React, React Native, Node.js, Next.js, SwiftUI, Scikit-learn, TensorFlow, Keras, OpenCV, Pandas, NumPy, Tesseract OCR, Bootstrap, Tailwind CSS, Pine Script
<i>AI & Auto</i>	LLM Agents, Agentic AI, Google Gemini API, OpenAI API, Prompt Engineering, N8N, Custom Python Automation Pipelines
<i>Mobile</i>	iOS (Swift/SwiftUI), Android (Java/Kotlin), React Native, App Store & Play Store Deployment
<i>Databases</i>	MySQL, MongoDB, PostgreSQL, Firebase, Supabase

Tools Git, GitHub, Docker, Linux, VS Code, Xcode, Android Studio, Figma, TradingView, Telegram/WhatsApp/Discord Bot APIs

SELECTED PROJECTS

<i>2024 – 2025</i>	Fully Autonomous YouTube Generation Pipeline. Built a 100% Python-based system (no N8N or workflow tools) that produces 30-minute YouTube videos with consistent characters across episodes — handling scripting, voiceover, scene generation, and auto-publishing.
<i>2024 – Present</i>	100+ Automation Agents. Designed and deployed intelligent bots for Gmail, Instagram, Telegram, and WhatsApp using N8N and custom workflows — automating DMs, email responses, alerts, and business processes.
<i>2024 – Present</i>	Custom Pine Script Trading Indicator. TradingView indicator delivering entry/exit signals, profit zones, and trade-quality filters for spot and futures markets using wallet-based strategies.
<i>2019 – 2023</i>	DocoMedo — Telehealth Platform. Full-stack web platform enabling 4,000+ online appointments. Personally designed and developed the entire UI, database schema, and user flow.
<i>Academic</i>	ML Attendance System. Implemented and benchmarked SVM, KNN, and ANN models for accuracy in an attendance classification system.
<i>Academic</i>	Stock Price Predictor. Real-time stock price forecasting using yfinance, Scikit-learn, and regression modeling.

CORE QUALITIES

- **System Thinker:** Sees technology as interlinked workflows and systems.
- **Fast Executor:** Moves from idea to MVP within days, with a track record of shipping to production.
- **Self-Taught + Degree-Driven:** Combines practical, self-taught knowledge with formal academic structure.
- **Mission-Focused:** Builds solutions that drive tangible value and solve real problems.
